UL 1316 UNDERGROUND FUEL, DIESEL + DEF TANKS

Our Fiberglass Fuel Tanks

Nationwide's fiberglass fuel tanks are UL 1316 Third Edition compliant and boast our corrosion-resistant *OxyShield™* resin system, compatible with various fuels including ethanol blends, biodiesel, and ultra-low sulfur diesel. Our tanks provide long-lasting, hassle-free service against corrosion, outperforming steel tanks which require costly cathodic protection and coatings. Our superior design and innovative resin technology ensure that customers have the best petroleum tank available.

Compartment tanks offer retailers numerous benefits by allowing storage of multiple fuel blends in one tank, reducing costs for excavation, permitting, and shipping. As multiple-compartment petroleum tanks grow in popularity, the environmental and cost-saving advantages of Nationwide Tanks' independently monitored compartments offer the versatility to only have one compartment down if any issues arise while the tank is in service. This also ensures the ability to pinpoint issues quickly while limiting downtime and lost revenue.

Standard Features

- UL 1316 (Third Edition) listing with most stringent resin requirements
- New *Helical Armor Tank™* Design Superior features patent-pending *Dynamic Band™* Technology
- Compatible with all ethanol blended fuels, biodiesel and ULSD
- Advanced design using 100% corrosion-resistant *OxyShield™* resin with no fillers
- *Dynamic Bands™* universally work with brine or dry monitoring options
- *Dynamic Band™* Technology allows for more space for shell fittings
- Resin-rich smooth liner for maximum corrosion-resistance
- Double-wall design around the full circumference of the tank
- Single, double, or triple compartment models
- Independent monitoring of multiple compartments
- 8' & 10' diameters
- Capacities up to 40,000 gallons
- Competitive lead times
- Exceptional customer service
- In-stock tanks and ready-to-assemble shells for quick delivery
- 30 year Limited Warranty

8' DIAMETER UNDERGROUND FUEL TANKS

Nominal Capacity [US Gallons]	Water Volume [US Gallons]	Total Length [Feet]	Weight [lbm]	Number of Straps [Total Quantity]
5,000	5,580	17' 6"	5,600	2
7,000	6,710	20' 6"	6,100	2
8,000	7,840	23' 6"	6,600	2
10,000	10,084	29' 6"	7,600	2
12,000	12,343	36' 3"	10,700	4
15,000	14,602	42' 6"	9,700	4
18,000	17,991	50' 3"	11,300	4
20,000	20,242	54' 6"	16,000	4

10' DIAMETER UNDERGROUND FUEL TANKS

10,000	9,500	19' 6"	7,200	2
13,000	13,016	25' 6"	7,900	2
15,000	14,782	28' 6"	8,900	2
18,000	18,305	34' 6"	10,400	4
20,000	20,063	37' 6"	11,000	4
25,000	25,351	46' 6"	12,400	4
28,000	27,611	49' 6"	12,800	6
30,000	29,369	55' 6"	13,400	6
34,000	34,171	62' 6"	16,200	6
40,000	40,135	73' 3"	20,600	6

Company History

With over 20 years in the fiberglass industry, our parent company began manufacturing tanks in 2009, committed to the highest quality and stringent standards. We're the sole U.S. manufacturer of UL 1316-compliant underground fiberglass fuel tanks and offer UL 2447-approved sumps. In 2021, we expanded with a new plant in Marion, SC, rebranding as Nationwide Tanks. Our vision is to excel in the underground fuel and water market by delivering top-notch products, engineering, quality control, and customer service, always on time.
